

# Literacy Stations Set 4

1. **Math:** Students will make patterns to correspond to a letter pattern (AB, ABB, ABC, AABBCC, etc.). Students will use several different manipulatives to create the same pattern.
2. **Book Corner:** Students will read books from the book corner. They may read/browse the books alone or with a friend at the station. Students may read with a stuffed animal.
3. **Working With Words:** Students will unscramble sentences about ants and copy the corrected sentences on a piece of paper. They may draw a picture of ants working together if they have time left over.
4. **Art:** Students will make a picture with ants, using ant cut outs from the reading series. They will need to include background details. There will be ant books available for the students to use as a reference.
5. **Spelling:** Students will do Rainbow words to practice the spelling words. If they get finished early, they may use sign language and or magnetic letters to spell the words.
