

Literacy Stations Set 8

1. **Computers:** Students will play Arthur's Reading Race on the computer.
2. **Chickens:** Students will read *Dan's Pet*. They will color and assemble a book titled "How a Chick Hatches". There will be books about chicks/chickens available at this station for the students to browse through.
3. **Math:** Students will put number tiles in order from 1 – 100 using the Investigations number tile boards.
4. **Science:** Students will make four trees, one representing each season. They will use tissue paper to make the leaves for each season (green flat for summer, green scrunched up for spring, red, yellow, orange for autumn, and nothing for winter).
5. **Overhead:** Students will place magnetic letters on the overhead projector to spell their spelling words. They will trace the images on a large piece of butcher paper. If time permits, they can color in the letters.
